

STONY PLAIN SUN.

VOLUME FOUR

STONY PLAIN, ALBERTA, THURSDAY, JULY 10, 1924

WHOLE NUMBER 205

A Few Clean-up Prices:

- 3 Iron Beds, reg. 9.50, 7.50, for 5.50.
- 1 Iron Bed, reg. 22.00, for 15.00.
- 1 Iron Bed, reg. 14.90, for 10.00.
- 1 Findlay Arkian Range, with tiled back and reservoir and high closet 40.00.
- 1 Columbia six 9-inch holes, 45.00.
- A good stock of Barbed Wire and American Hog Fence.

A. E. MICHAEL'S,
A GOOD PLACE TO TRADE

The Holborn Dance.

The new home for Holborn U. F. Local sure had a good opening on Friday night. The spacious new hall was crowded to the utmost to accommodate the large crowd of dancers, which enjoyed the good music of the Mustang orchestra. The excellent lunch provided was voted "a peach" by those who participated. About 3 a.m. the dance adjourned and all promised to meet in the same place to-morrow night for another good dance. Everybody welcome. Some orchestra, same good time.

Pool Farmers Get More

Members of the Alberta Wheat Pool will receive 25c per bushel more for their wheat than the average price received by farmers outside the Pool, says H. W. Wood, chairman, Board of Trustees. The Pool price is \$1.02 per bushel, while the average price for Fort William for the pool was 90c. From this the administration expenses of the Pool, to a hundred, will have to be deducted.

It Grows Hair

For Your Money Back
Thousands of women are growing new hair and putting an end to scalp ailments with the new Van Es method of treatment. Van Es Liquid Soap Shampoo makes it easy to give the scalp proper care and to have a head of abundant and glowing hair. The rubber nipples on the patent applicator feed the treatment directly to the hair roots and at the same time gently massage the scalp. Ask us about our money back 70-day treatment plan. We give you a positive guarantee.

J. F. CLARKE,
Stony Plain Pharmacy.

Inga Councillors.

Inga Councillors held their regular monthly meeting in Stony Plain last Friday, with Reeve Howat presiding. Accounts for road work done in the several divisions were passed and ordered paid. The matter of the road on Edmonton Beach was the cause of a lot of discussion, and finally the action taken by Councillor Geerz was approved. The question of continuing the Meridian road south from Sinner's corner was laid over for further discussion. A very good report was given by Councillor McKillop regarding his trip last month to the Good Road Making Convention at Lacombe.

The Brightbank Picnic

The Bright Bank picnic on June 30 was a huge success, and had a big attendance. Games of all kinds were indulged in, with a baseball game between Comet and Bright Bank, the latter winning, 19 runs to 7. The tug of war, Married v. Single, was won by the former after a hard tussle. The bronco buster, Jack McDonald, gave a very good exhibition of his art, and was heartily applauded. The dance in the evening was generously patronized, and all had a pleasant time to the music of the good local orchestra.

The numerous prizes given the young people in the contests was greatly appreciated, and the teacher, Mr. Percy Lawton, deserves great credit for his splendid management of the whole affair during the afternoon.

Shoppers are reminded the Wednesday half-holiday will be in operation in Stony Plain and continues through July and August.

LOCAL NEWS.

IT PAYS TO ADVERTISE!

Miss McFarland and Miss Lawton, Edmonton, were Saturday visitors with Mrs. Mord MacKillop.

Miss E. J. Hartley, the popular teacher at the local school, is now in residence at Athabasca Hall, taking a summer course in the University of Alberta.

Messrs. J. Hardwick and S. G. Miller returned Monday from a very successful trout fishing trip in the Rockies.

Mr. H. W. Panabaker, who was prominent in Church affairs in Stony two years ago, and has been principal at Nanton school the past year, was given a handsome present last week on leaving for his home in Ontario.

A meeting of the Local Women's Institute will be held at Mrs. McKillop's cottage, Edmonton Beach, this afternoon.

Owing to unavoidable circumstances, the big ice cream social and dance billed for last evening in Stony by the local Women's Institute had to be postponed.

Somerfield & Schultz, agents for the Chevrolet, report the following sales: R. B. Brooks and Dan Giese, Stony Plain; Pete Miller, Mewasip; and R. Glasser, Winterburn.

Two horses belonging to local farmers were killed on Saturday morning at the Ali crossing, a mile east of town.

At St. Matthew Church, on Tuesday July 8th, Miss Mary Schuetz (daughter of Mr. and Mrs. Ph. Schuetz, of Spruce Grove) was united in marriage to Mr. H. M. Ducholke, son of Mr. and Mrs. George Ducholke.

Auto owners of town and district held a meeting in the Town Hall Saturday evening to discuss the question of organizing for the summer. Mr. Wright of Edmonton gave an address, showing the advisability of forming a branch of the Edmonton Good Roads and Auto Assn., and urging that this function be taken. A lengthy discussion followed, and the meeting adjourned for a week, when it is expected the organization of a branch in this district will be completed.

The Cost Of Automobiling

There are at least 150,000 licensed automobiles in the three Prairie Provinces, and it is undoubtedly a safe and conservative estimate to place an average value of \$1,000 on these cars. This represents an approximate investment for cars alone of one hundred and fifty millions of dollars.

The purchase of a car is, however, but the beginning of the expense bill. In the cities and larger towns ownership of a car involves the building of a garage in which to house it, or the payment of a monthly rental for storage in a public garage. Building permits recorded in Western cities in recent years include thousands of permits for private garages, and the cost of these would in the aggregate provide for the erection of many residences.

Then before the car can be operated a Government license must be obtained. The cost of these varying according to size and cost of the cars, but a low average may be placed at \$15.00 per car, or a total of two and one-half millions of dollars paid to Government.

Gasoline and oil are a further requisite if a car is not to stand idle. Again striking averages it is probably not excessive to assume an average of two gallons of gasoline per car per day, or, at a period 200 days in the year. Any less average consumption than this would mean that a car owner was not getting value in service for his capital investment in a car. Gasoline consumption would, therefore, amount to 300,000 gallons a day, or 60,000,000 gallons for the 200-day period, and at 35 cents per gallon, will reach the substantial total of \$21,000,000. Add oils and the bill will not fall far short of twenty-five millions of dollars for power and lubrication.

Then comes the bill, extremely difficult to estimate, for tires, repairs, recharging and replacement of batteries, and public garage services of one kind and another. Let this be placed at the low average of \$100.00 per car—some new cars will run less than this, but others will exceed it several times over in a season—and another fifteen millions of dollars is added to the total.

Still another item is that for insurance on the car against theft, fire, personal liability and property loss; also insurance against fire on the garage building. Some car owners may not protect themselves in this way, but as a strictly business proposition they should. Put insurance down at an average of \$30.00 per car, which is too low, and it comes to four and one-half millions of dollars.

These are the main cost items of automobiling in the three Prairie Provinces, but they do not include many other items too numerous to mention. They represent a formidable bill of two hundred millions of dollars, or an average of \$1,000 for every man, woman and child in this Western country.

Eliminating the original capital investment for the cars, and charging seven per cent. on the money so invested, it will be found that the annual cost of maintaining the West's large and steadily increasing fleet of motor cars is between fifty and sixty millions of dollars.

To the extent that cars are used for business purposes, and are, therefore, revenue producing for the owner, this large expenditure in these so-called "hard times" may be justified. But it is a pretty well recognized fact that years of thousands of these cars have been purchased and are used for pleasure purposes only.

Ownership of a car was kept in bonds and limited so long as the purchase of one was a spot cash proposition, although even then some people were foolish enough to mortgage their homes and businesses to buy a car. But when the manufacturers adopted the policy of selling cars, on time with a small cash payment down, it became a case of "Keeping up with the Joneses," and everybody began doing it, many little realizations that the monthly cost of upkeep of a car was all their resources could stand without also having monthly payments to meet on the purchase price.

City men use a car now instead of walking a score or so of city blocks to their offices, thus losing the exercise which their sedentary occupations make so necessary to good health and physical fitness. On the other hand, the automobile has made it possible for city people to get out into the country and to summer resorts, golf links, etc., to an extent that was formerly impossible. It has been a boon to many young mothers thus enabled to take the children out for an airing. It has been an important factor, along with the rural telephone, in banishing much of the isolation and loneliness of farm life, and in times of sickness and accident has become indispensable to doctor and nurse.

One of Nature's Secrets

Here's a tree planted 294 years ago that will bear fruit again this season. Last year it yielded a bushel of pears. The tree is at Danversport, Mass. It was brought over from England by Governor John Edickott in 1630 and planted on his farm.

Why does Nature give 294 years of life to an unintelligent, relatively useless, tree—dead hill of men with super-brains before they are a third as old? Is she jealous of her secrets, afraid we'll learn too much? You've noticed that the finest brains usually are in weak bodies—Nature trying to destroy them.

The title of doctor is believed to have been first adopted in the 12th century.

The "bald" eagle lives chiefly on fish, dead or alive.

CHILDREN CRY FOR "CASTORIA"

A Harmless Substitute for Castor Oil, Paregoric, Drops and Soothing Syrups — No Narcotics!

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Cuts and Diarrhea; allaying Feverishness, teething, and, by regulating the Stomach and Bowels, aids the assimilation of food; giving natural sleep without opiate. The genuine bears signature of

The Modern Girl

The most deadly foe of the girl of today is fatigue, according to Dr. Chella, Thel Mosher, of Leland Stanford University. "The modern girl craves a short but rich life," Dr. Mosher says. "She fills her life with incessant activities and thus courts nervous bankruptcy."

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism are treated with Dr. Thomas' Electric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory sores, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

If clothes make the man some men must patronize mighty poor tailors.

Human hair varies in thickness from the 25th to 600th part of an inch.

Following a four weeks lay-over in Vancouver, during which time she was thoroughly reconditioned after her five months cruise around the world, the Canadian Pacific Express of Canada resumed service on the regular trans-Pacific schedule when she left recently for Oriental ports. A capacity cargo of high-class merchandise for Japanese and Chinese markets, as well as the usual exports of fur, asbestos, lead, cigarettes and automobiles was in her hold.

Where Murder Is Commonplace

More Than 10,000 Murders a Year in United States

The murder record of the United States has reached a point where it has aroused comment from the Americans themselves.

A newspaper statistician recently put the situation emphatically in these words:

"If these 24 hours run true to form there will be 23 Americans slain."

That is, it seems, the daily murder score in the United States.

In other words, there are, in the neighboring republic, more than 10,000 murders a year.

But these figures account only for the murders brought to light. There must be others never reported. Then, too, of the long lists of missing persons reported, some, unquestionably, are victims of assassinations.

More than that, the proportion of murders to the general population is increasing.

Twenty years ago the United States was twice as safe a country to live in. In other words, in twenty years the murder rate, in proportion to population, has doubled.—Stratford Beacon-Herald.

Discover New Sport

Rabbit Hunting On Motorcycles Becoming Popular in California

The mysterious nocturnal roar of motorcycles in the open fields, at Del Rosa, near San Bernardino, Cal., which for some time caused farmers in the vicinity many sleepless nights, was explained recently by a youth who declared that rabbit hunting on motorcycles by night was fast becoming the popular sport of the town cyclists. He explained that riders chase the rabbits through the fields until the animals, near exhaustion, tired, drew up alongside and grabbed them by the ears.

Stomach Cramps

Yield to "Nervine"

When doubled up at midnight with cramps you can't feel like experimenting; what you want is something to remove the cramp. Nothing so effective as Nervine. Take twenty drops in a little sweetened water, and quick as wink the cramp is gone. Nervine is about five times as strong as most medicines, and because so strong, only a small dose is required to give instant effect. For indigestion, cramps, colic, Nervine should be kept in every home. For sure protection, get "Nervine" today. See at dealers.

Germans Like Mosley

Hockey and cricket, played by few in Germany before the war, are gaining in popularity, but tennis continues the game most in vogue. While the number of golf players has greatly increased in the past few years, the spread of this game is hampered by the lack of ground for links. Berlin, for instance, has only two courses.

Dust Causes Asthma. Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

United States to Assist Europe

The United States is not only willing but anxious to assist Europe in pushing the settlement of her reparations problem, but does not intend to participate in any political difficulties overseas; a spokesman for President Coolidge said, commenting on the proposed inter-allied conference in London to consider means of putting the reparations experts' plan into effect.

Whether the corn be of old or new growth it must yield to Hillovary's Corn Remover.

Using Hydrogen For Inflating Dirigibles

British Specifications Call For Use Of Inflammable Material

In spite of frequent disasters to the rigid type of dirigible, the airship is to be given further trial by the British Government. The record of the Shenandoah, though still brief, is encouraging. The longer record of the R-34, the British craft, which visited New York a few years ago, it notable. The tragedies of the R-38 (ZB-1) and the Roma do not prove that dirigible safety is impossible to attain.

The Shenandoah is inflated with helium. But that gas, while non-inflammable, has disadvantages. It is not so buoyant as hydrogen and an insuperable objection to it, from the British viewpoint, is that it is obtainable only on this continent. The dream of a quick airship service between Australia and England, via India, Singapore and Ceylon, hardly could be realized if the precious helium had to be brought from America.

So the specifications for the two great airships authorized by the MacDonald Government of Great Britain call for inflation with the highly inflammable hydrogen. It is believed, however, that safeguards in the vicinity of the lateral-combustion engines will reduce the risks of fire to the minimum. It is pointed out that it is the gasoline vapor about the engines which has fired first, thus setting off the hydrogen. A great advantage in hydrogen is that the surplus which now is allowed to escape as the burden of the ship decreases on a long trip, through consumption of fuel and other stores, may be used for fuel for the engines themselves. This would increase the cruising range.—From the Buffalo Express.

Canadian Exports To U.S.

Products of Forests Helps Greatly to Boost Amount of Exports

Canadian exports to the United States for the twelve months ending with April, 1924, show an increase of something more than 48 millions of dollars over the corresponding period of 1923-24, and an example of the rapid growth in the demands of the United States upon the forest resources of the Dominion is furnished by the fact that of this 48-million increase, 21 millions comes from wood and paper exports. Next to wood and paper exports, animal products are of greatest importance in Canada's exports to the United States, with agricultural and vegetable products third.

NERVOUS DEPRESSION

Why People Are Low Spirited and Depressed

Nearly all women and most men suffer at times from fits of depression and low spirits. Everything seems a burden; then come periods of nervous irritability, headaches and weariness. People who suffer this way lack vitality because their blood is poor and nerves are starved in consequence.

The only way the nerves can be reached is through the blood. By enriching the blood with Dr. Williams' Pink Pills the starved nerves are supplied with just the elements they need. This is proved by the experience of Mrs. J. E. Dodson, 12th Ave., east, Vancouver, B.C., who says: "About three years ago I became very weak and nervous. I had pain in my side and back and also suffered from frequent pains in the back of my head and neck. I was hardly able to do anything about the house. I would wake with a start in the night and my heart would flutter so that it almost choked me. I tried many doctors' medicine but it did me no permanent good. One day I read about Dr. Williams' Pink Pills and decided to give them a trial. These pills produced such a beneficial change in a short time that I kept taking them until I had used a dozen boxes. By this time there was such an improvement in my condition that friends would ask me what I was taking, and of course I was only too pleased to tell them it was Dr. Williams' Pink Pills. I am now feeling like a new person and am doing my own housework. I would not now be without work. We could not now be without work. We could not now be without work."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Million For Grain Elevator

A vote of \$1,000,000 for the construction of the government grain elevator at Edmonton, was passed in the House of Commons in committee of supply. Hon. Thomas A. Low, minister of trade and commerce, stated that the elevator would have a capacity of 2,000,000 bushels. It was hoped that it would be ready by the time the next crop was moved.

Only Small Percentage Of Population Of The Dominion Born Outside Of British Empire

Those who fear that Canada is becoming too heavily populated by people of foreign stock may take comfort from the Census Bureau's bulletin analyzing our population on the basis of origin and birthplace. The figures show that of 7,385,463 persons in Canada only 339,233 were born outside the British Empire, and that of these a large number came to us from the United States—people moulded in the same traditions and having much the same ideals as ourselves.

In the decade the population of the Dominion increased by 1,581,840, and the Canadian born accounted for 1,212,985, while immigration from the British Isles numbered 229,387, and natives of other British countries, 10,388. Only 137,550 came here from outside the Empire; the United States supplying 70,344 of the total. In other words, the increase of our foreign-born population in the ten years, excluding the United States, was less than 70,000.

If we continue to increase our population from the same sources as before the war—and the door was pretty well open—there is hardly a question but that we can absorb and Canadianize the majority of foreigners that come to us. Last year we received 148,980 immigrants, of whom 72,919 were from Britain, 26,521 from the United States, and 49,540 from other countries. In 1932, when immigration was at its height, 402,432 came in—159,542 from the British Isles, 139,909 from the States and 112,981 from other countries.

It should be noted, too, that the term "other countries" includes Norway, Sweden and Denmark, from which we get a great many of our best agricultural immigrants. The Census Bureau locates the majority of the Scandinavian settlers on farms, while Greeks, Italians and Poles (not Galicians) are found mostly in the cities.

If we take the large numbers of more desirable, farm immigrants, there remains but a small proportion of our foreign immigrants who are likely to give trouble. These are now largely grouped in "foreign quarters" in our larger cities, and we sometimes become perhaps unnecessarily alarmed lest they manifest some of the social tendencies underlying much of the evil in Europe. Yet some of the most efficient of our so-called Reds hail from the British Isles, others from the ranks of the Clyde. Certainly they are the least noxious. These, however, we may perhaps sensibly treat with the same unconcern that the London policeman manifests when he gets an earful of Moscowism from the Hyde Park orator. The "bobby" has long since learned that they are not dangerous if you let them talk.—Ottawa Journal.

Panama Carried More Tonnage Than Suez

Oil Responsible For Traffic Gain On American Waterway

The fact that the Panama Canal, though its completion is comparatively recent, carried last year—for we believe the first time in history—a larger tonnage than did the Suez Canal, the great waterway of the east, is worth noting.

In 1932, the Suez Canal outdistanced its younger competitor, carrying 20,743,000 tons of freight to 12,992,000 tons, passing through the Panama waterway.

In 1933, however, the Panama tonnage reached 23,737,000 tons, or nearly double that of the preceding year; while the Suez Canal carried 22,730,000 tons of freight. The difference may be comparatively slight; but it was sufficient to put Panama ahead.

Why the pronounced gain in tonnage? Oil—which in recent weeks has caused so much furor—is understood to be responsible. The tanker traffic from California is given as the chief factor in the enormous traffic gain on the American waterway.

And Suffered More Justified Criticism

Justified criticism of the film, I may I criticized the film, Helen made and she hit me with one of them.

W. N. U. 1932

Railway Rivalry In Efficiency

Country Benefits Generally From Healthy Rivalry Between Two Great Roads

Not so long ago Canadian railway time tables were humped in the breach. The improvement in the running of passenger trains on the Canadian National Railway and its predecessors is most marked because formerly the practice was particularly bad. Daily the Trans-Canada train from the west at 10:50 a.m. and travellers all the way from Vancouver are able to get their watches at every divisional point by the printed time table. Canadian travelling on this train have reason to be proud of the equipment, the train crews, and the machinery that keeps the track clear.

The country generally must benefit greatly from the healthy rivalry in efficiency that is now being carried on between its two great railways, one publicly and the other privately owned. Both incidentally are striving to develop the foreign tourist trade which brought scores of millions of dollars into Canada last year without going beyond the fringe of the gold mine that waits to be tapped; and the fine train and hotel service that both are giving makes greatly to that end.

The C.P.R. has for years been noted for the splendid esprit de corps of its staff, and travellers are nothing with satisfaction that Sir Henry Thornton and his aids are meeting with much success in the same direction on the other railway.—From the Ottawa Journal.

The Tragedy of the Treeless Town

By Archibald Mitchell, of the Canadian Forestry Association

The other side of the picture is the treeless town—the carrels, slippish huddle of houses where nothing matters but the making of money—where the homes are but placed to eat and sleep, with no pleasurable associations to bind their inmates with love of the place. Growing things they cherished in childhood and in after life. Children, leaving such a town to go out into the world, feel no pang of parting from the trees they planted with their chubby hands. They, poor things, have never planted a tree. They have no affectionate longing, in after life, to again see the dear, guarded maple whose tapping at their bedroom window welcomed their arousing from childhood's slumber, to blink happily at the bed-room window, dancing through the interstices of the shining foliage.

Trees, flowers, green grass—they bind the inmates to the home they call home. There, in the corner of the lawn, is mother's tree. Its blossoms were over the finest and sweetest in the garden. Down by the gate in the sturdy fir that dad planted that day in the Easter holidays of long ago. You helped "pick" it. Its long the hole you held the true straight while dad carefully patted the brown earth about its roots. Dad and mother have long since gone the way of all flesh. But the trees they loved remain to link you up to the memory of other days when an undivided family sat at table beneath their comforting shade. Dad's trees, mother's tree-blessed, upspringing, living green monuments to revered memories!

Want Newspaper Convention

Intimating that it was expected Winnipeg would be selected by the board of directors of the Canadian Weekly Newspapers' Association, which meets in January, as the city in which its 1935 convention would be held, Premier John Bracken has received a communication from E. R. Stiles, manager, Manitoba, extended an invitation to the association in a telegram sent while the convention was in session recently in Toronto, which was strongly supported by the western members.—Free Press.

Such a Good Woman

Aunt (talking scandal)—"Mrs. Mashies? Oh, surely not! She is as awfully good woman; as devout."

Niece—"But she's dirty outrageous!"

Aunt—"Yes, but only with the clergy."

Foot and Mouth Disease

Great Precautions Necessary For Protection of Livestock Raisers

Outbreaks of foot and mouth disease, probably the most infectious malady of animals, have never occurred in Canada.

The disease has caused tremendous losses to the agricultural industry in other countries. There is no permanent cure for it. While it is essentially a disease of cattle, sheep, swine and goats, all ruminating animals are susceptible. Horses, dogs, cats and even poultry have been victims. Man may also become infected and children frequently suffer through drinking raw milk from infected cattle.

The British authorities have been endeavoring at a cost of millions of pounds to eradicate the infection of this disease in that country for over two years, and those of the United States are similarly engaged in the State of California, where it was recently introduced from foreign countries through the port of San Francisco.

The Canadian federal department of agriculture, with a view to protecting livestock interests, are enforcing the most stringent regulations which cover the species of animals, the modes of transport, and the means of infection of the disease.

If livestock-owners should have reason to suspect the existence of this disease in Canada, it is of the utmost importance that they notify the nearest veterinary inspector and telegraph collect to the Veterinary Director-General at Ottawa.

In the meantime they should tie up their dogs and not permit anything to leave their premises. Prompt control measures and the willing and intelligent co-operation of the stockmen are essential to prevent disastrous results if the infection of this disease gains entrance to Canada. Everyone should remember, however, that prevention is better than control.

Coal Discovery

Seam of Lignite Coal Is Found Near Lawton

A seam of lignite coal 15 feet in thickness has been found on the farm of J. A. Mitchell, a couple of miles from the town of Lawton on the Moose Jaw Riverhurst branch of the Canadian National Railway, W. V. Hastings, mining engineer of the department of industries, Saskatchewan, who has made an examination of the spot, states that the coal appears to be a good average grade of lignite. At the point where the coal was tapped in the process of sinking a well the over-burden is only 14 feet. Mr. Hastings recommends that the government undertake to do a limited amount of drilling in the area, sufficient to determine the extent and also to ascertain if there are deeper and harder seams below the one in question. The Canadian National Railway passes close to the locality where the coal was found.

If this coal proves to be as good a quality as thought, a mining industry will undoubtedly be developed at Lawton, owing to the proximity of such good markets as the cities of Moose Jaw and Regina, also other towns in that part of Saskatchewan, to say nothing of the demand there would be from the farming communities in that well settled section of the province. Riverhurst is 30 miles north of Moose Jaw and this is the furthest north of such a large seam of coal has yet been found in the settled areas of Saskatchewan.

Black Bass For Saskatchewan Lakes

The fishery hatched at Qu'Appelle are now engaged in the breeding of the famous Ontario Black Bass, and it is hoped to secure the co-operation of anglers in properly stocking the waters of Saskatchewan with these game fish as the fry become available. An attempt is also to be made to stock small lakes that are at present barren of fish life, with perch.

Has One Advantage

An electric machine that lays as many bricks as 20 bricklayers is being marketed to the building trades—a feature of it being that it doesn't have to stop every few minutes to light its pipe.—Hamilton Herald.

The Question's Solved

Comely Maiden—Why are all your spokes of "what's?" It's because they glide so gracefully, I suppose.

Hostess—No, miss it ain't. It's because their rigids' costs so much.

Bird Protection In Canada Is Of Utmost Importance And Of Vital Concern To Farmers

Conservative estimates place the annual loss of the Dominion through the destruction by insects of growing crops at \$100,000,000 or more, which sum could be materially reduced if birds are present in any given locality in sufficient numbers to prevent the excessive increase of those insect pests on which they live to a large extent.

As this loss is mainly sustained by farmers, they should be the greatest exponents of the protection of Canada's bird-life, but unfortunately many of them are not fully informed on the advantages to be derived by having birds around the farm. In the work of improvements or draining of swamp lands, many of the birds' best feeding grounds are unintentionally destroyed. It has been frequently said that birds destroy the crops, but abundant evidence has been gathered by reliable authorities to show that the majority of birds only injure the crops when their natural food is lacking.

It is only within the last decade that an active, organized campaign has been carried on to protect bird-life in Canada. Many individuals and societies have been interested in this work, but it was not until 1917, when the Migratory Birds Act was passed by the Federal Parliament, that operations were carried on as a business-like basis.

Among other things, this act provides for the establishment of bird sanctuaries, and to date reserves have been set aside in practically all provinces of the Dominion. Among the more notable, operated by and in conjunction with the Dominion Park Branch, are the sanctuaries at Percé, Bird Rock in the Magdalen, and portions of Bonaventure Island, off the Gaspé Coast. It is the province of Quebec, Jack Miner's farm and the municipal park at Niagara Falls, in Ontario; Last Mountain Lake, in Saskatchewan; Rideau Island and Lake Newell, in Alberta. The killing or hunting of birds in these game reserves is prohibited by law.

From time to time various objections have been made against the establishment of sanctuaries, but the necessity of the desirability of setting aside breeding grounds is now generally recognized by sportsmen, and there are many others who are not aware of the imperative need of protecting Canada's birds, some of which are rapidly becoming scarce. It is the duty of the government to educate the public to the need of protection for birds, the Dominion Government has under way an extensive educational programme which will undoubtedly do much to dispel the fog of ignorance regarding bird life in Canada. To date over 100,000 pamphlets have been issued on bird protection, one of which, "Lessons in Bird Protection," has been authorized for use in every school in Canada. Posters also have been issued concerning the shooting seasons and other bird protection matters. In addition, numerous lectures have been made before schools and other public bodies interested in this subject. In connection with the latter, motion pictures and lantern slides have been shown.

Another phase of educational work which has been of valuable assistance in this work is the encouraging of bird-house building. During the past two or three years bird-house competitions have been organized in various school districts. In Ottawa and some of the larger cities, the manual training teachers have directed the boys in the building and designing of bird houses, and several hundred bird dwellings have been built this spring in the city of Ottawa alone. In addition a number of bird houses have been made and erected in some of the national parks.

Among the private organizations interested in bird protection is the province of Quebec Society for the Protection of Birds, which was organized in Montreal in 1917 shortly after the Migratory Birds Act was passed. This association has been particularly active in Quebec in disseminating information regarding birds and has been instrumental in promoting numerous educational programmes designed to further the protection of bird-life in Canada.

In the prosecution of this work it has been necessary of all times to

have the co-operation of the United States authorities, and an agreement has been entered into by the two governments for the protection of migratory birds. This pact has worked out satisfactorily, and game wardens on each side of the border have been particularly vigilant in protecting the birds during their annual migrations.

The work already done in protecting birds by the Federal Government, societies and individuals has been of much importance, and it is hoped that the next few years will see a gradual, if not rapid, increase in the number of Canada's birds. They are not only valuable from an aesthetic, but from an economic standpoint.

Tree Planting Car

Keen Interest Being Aroused Every Where in Prairie Communities

To make the west still more beautiful, to better farming conditions from the economic standpoint, and to cover the prairies with permanent and attractive homes, is the great mission that is carrying the Tree Planting Car of the Canadian Forestry Association over the western prairies. Its remarkable success is being attested by the keen interest aroused everywhere among prairie communities and by the hundreds of requests that are pouring in for the further services of the car.

The features and demands of the machine of the car are tackling the problem of a more stabilized population at its very root, viz. by tree cultivation, inducing action by holding public meetings of settlers, through the medium of motion pictures, radio addresses, enlisting the aid of the press, of community clubs and boards of trade, and by practical outdoor demonstration in planting and pruning.

Scores of municipalities have been started on the way to park and highway planting with the necessary blue-print plans and working data and definite boosting given the cause of successful agriculture and permanent homes.

The Tree Planting Car's practical form of assistance is a vital factor in the lives of thousands of settlers. Very considerable numbers have been coming into the farming areas of Manitoba, Saskatchewan and Alberta, each season, many of them unacquainted with the best farming practice and any real knowledge of horticulture and tree planting problems. Owing also to the peculiar demands of the soil, certain varieties of trees can be expected to survive, and naturally under the conditions the majority of plantations set out by the newcomers were doomed to be failures.

It is for this reason that the expert advice of the Canadian Forestry Association Car proves of value. It is showing the new farmer how to plant his windbreaks for protection to man and beast; the right species to select; how to care for them afterwards, properly. The settler has all the evidence around him that trees make the place home-like in summer, hold back the drifting snows of winter, protect the buildings from damaging storms, shelter gardens, attract singing birds, increase the value of the land, conserve the all-important rainfall, and by turning the bare prairie into cozy and arid life homes, bring contentment into the lives of the farmer and his family.

University In Africa

The British Government has agreed to a scheme inaugurated by the Governor of the Gold Coast, West Africa, for the construction of a large university college near Accra, the capital of the colony. The chief purpose of this university is given out as being for the education of Africans desiring to enter any profession without the necessity of going to Europe.

New Product From Western Canada

What is commercially and traditionally known as Epsom salts is now being produced in the western Canadian provinces in considerable quantities. To the mining man this product is known as magnesium sulphate, and as such is being mined at several points in British Columbia.

In Los Angeles, a planter collected a hill nine years old, proving they don't forget everything.

FAVOR A SINGLE SELLING AGENCY FOR WHEAT POOL

Brandon, Man.—Resolutions supporting the formation of an inter-provincial selling agency to handle wheat in the three prairie provinces, and fully empowering the directors to proceed with the creation of a selling agency were passed at the first annual meeting of the shareholders of the Manitoba Wheat Pool here.

A bylaw providing that the president and vice-president be elected from among the board of directors, and that the secretary-treasurer be appointed by the board, was adopted. Seven members will make up the board.

The arrangement made with the mortgage companies in connection with wheat pooling to the pool by their tenants was explained by J. Murray, of Winnipeg, counsel for the pool. This arrangement is one by which the tenants of the mortgage companies are enabled by the co-operation of the companies to market through the pool not only their own wheat, but the wheat of the companies.

Says U.S. Oil Resources Are Near Depletion

Fuel Problems Discussed At Conference By British Expert

London.—Sir Richard Redmayne, noted British mining expert, told the International Power conference that the oil resources of the United States would be exhausted within 2,000 years. The coal of the British Empire would be gone within a few centuries, he declared, and attention should be directed to utilizing the potential energy in fuel to the best effect so as to conserve the world's supply. A low temperature of carbonization in coal would be an important step in this direction.

Resent New Dominion Law

Chinese In Victoria Bitterly Incensed Over Registration Rule

Victoria.—Chinese residents of Victoria held a series of mass meetings and were specially designed tags on coat lapels July 1, expressing their protest against the new Dominion law requiring all Chinese in Canada to register. Speakers at the meetings declared that when China managed to solve her present problems and form a strong government it would inevitably retaliate against Canada. The enforced registration was bitterly resented by all Chinese, they said. Apart from the meetings there was no demonstration.

Teachers Go To Europe
Winnipeg, Man.—One hundred school teachers from the four prairie provinces entrained here for Montreal to join the annual tour of the Overseas Educational League, in which they will spend five or six weeks in Great Britain, France and Belgium, returning to Montreal from Cherbourg, August 21.

Study Taxation Methods
Ottawa.—The government has announced its intentions of bringing down legislation for the establishment of a board to investigate and study various modes of taxation to improve the existing system.

Did Not Advise On Canadian Naval Policy

Vancouver.—When the attention of Vice-Admiral Sir Frederick Field to questions asked in the House of Commons at Ottawa, criticizing a statement purported to have been made in Victoria by the commander of the British special sea squadron to the effect that Canada should equip four cruisers, Admiral Field categorically denied that he had made any such observation nor made specific reference as to what Canadian naval policy should be.

Bryan Supports McAdoo

New High Mark Is Reached In Forty-Second Ballot

Madison Square Gardens, N.Y.—William Gibbs McAdoo ran to a new high mark in the forty-second ballot in the Democratic national convention. He passed the much-sought goal of 500 votes by dint of much frantic work and persuasion and maneuvering on the part of his floor managers, who declared they had not finished their work yet.

Rumored close to the 46 and 44 ballot record of the Baltimore and San Francisco convention, respectively, the New York exhibition gave promise of setting a new mark. McAdoo hit his high mark so far in the fortieth ballot, when he polled 505½ votes. Smith at that time had dropped a little below his high level, 323½, made previous ballots. At the close of the thirtieth ballot McAdoo had stood at 415½ votes. Thus he gained nearly a hundred in the balloting and the votes he got were taken principally from John W. Davis who fell to 70 on the last ballot.

The feature of the session came when William Jennings Bryan, war horse of many campaigns, took the platform and declared himself for McAdoo. He declared the Democratic candidate must be firmly for prohibition.

Establish New Record For Prize Winning

Alberta Breeders Carry Off Premier Awards At Brandon

Brandon.—Sweeping before them all on the premier awards in one of the strongest fields of Hereford cattle, O. G. Boggs and Sons, of Dayland, Alberta, established a new record for prize winning at the Brandon fair. These leading Alberta breeders carried off the senior and grand junior, and reserve grand championships for both males and females in the Hereford classes. It is the first time in the history of the exhibition that any one exhibitor has achieved such a success in any breed. W. A. Alinger, of Leighton, Alta., also made a splendid showing in the Hereford division.

In the Ayrshire classes, which were not represented as well as in former years, Morrison and Sons, of Fairlight, Sask., and R. E. New and Sons, of Hawick, Que., shared honors. Henry Thompson, also of Fairlight, was well to the fore in the Jersey breed, while G. M. Read, of Stoney Beach, Sask., figured among the prize winners.

Western exhibitors were well represented in the different classes for sheep. Prof. J. P. Baskville, of the University of Alberta, who is placing the awards, expressed himself as greatly pleased with the high quality of the exhibits.

C.N.R. Branch Lines

Ottawa.—The last of Canadian National branch lines was disposed of by the Senate Railway Committee when the Kamloops-Kelowna branch was reported. In all, 22 of the 26 branch lines have been approved by the Senate committee and four have been rejected. The four rejected are the Oxyboro-Burnaby line; the Rouses line in Quebec and the Kolyington and Moffort branches in Saskatchewan.

Vote For "Beer By the Glass" In B.C.
Victoria, B.C.—Official election figures released by the Provincial Secretary's Department indicate that at least thirteen ridings have voted in favor of beer by the glass. They are: Alberni, Alton, Cariboo, Columbia, Esquimalt, Fernie, Fort George, The Islands, Nanaimo, Okanagan, Prince Rupert, Rossland, Trail, Skeena and Yale. The vote in Burnaby and Greton is a tie.

U.S. Presidential Nominations

W. G. McAdoo, who reached high mark at Democratic National Convention.

Approve Germany's Entry Into League

International Federation Thinks It Best Solution of Reparations Problem

Lyons, France.—Subject to final acceptance of the entire report, the International Federation of League of Nations Societies meeting here, approved the recommendation of the Economic Commission, favoring the experts' reparations report, calling for Germany's entrance into the League of Nations with a permanent seat in the council and expressing the conviction that the mechanism of the league at the best channel, find the best guarantee of a satisfactory solution of the reparations problem.

In a telegram to the Congress, Premier Trierot of France said: "France, cruelly wounded in the course of recent years, asks only just reparation for the damage she has suffered, but once that result has been obtained, she will be faithful to her democratic traditions and have no greater pre-occupation than to contribute with all her force to the organization of a sincere and lasting peace between the nations."

Claim Home Bank Not Legally Incorporated

Solicitors For Shareholders Prepare Defence on Double Liability

Toronto.—James W. Bain, K.C., and John G. O'Donoghue, K.C., counsel and solicitor, respectively, for the shareholders of the Home Bank of Canada, from whom the liquidator seeks to recover "double liability," have prepared their statement of defence. They claim that the Home Bank of Canada had no any legal right or power to issue, or dispose of, shares of its capital stock because it was never, at any time, a chartered bank duly and legally incorporated under and by virtue of the bank act and laws of Canada. They say that the defendants never, at any time, agreed to purchase shares of the Home Bank with terms and conditions attached that in case of the insolvency of the bank they would be called upon to pay double liability.

The matter, they say, was never brought to their attention, and, therefore, they claim the provisions of the Bank Act of Canada do not apply to them.

Crops Look Fine

Regina.—C.P.R. officials, returning from a trip over the Colony, Kinsley and Indian Head sub-divisions, report that crops are in excellent condition and growing very fast. Wheat is so well rooted that it can stand considerable hot sun without damage, they report.

Prince Will Probably Visit Ranch In October

Calgary.—"So far as we know, no particular plans will be made for the visit of His Royal Highness," said Professor W. L. Carlyle, manager of the E.P. Ranch. "It is probable that the Prince will make a quiet visit, just as he did last year. We did not know that he was coming, but we are delighted by the announcement." Professor Carlyle did not know when the Prince was coming, but assumed that the visit would probably take place in October.

Wants British Goodwill

South Africa's New Premier Declares Loyalty to Empire

Pretoria.—"Great British goodwill, and always will be, as far as my government is concerned, the first and chief friend of South Africa," declared Premier Hertzog, leader of the newly formed Nationalist-Labor Government at a Nationalist banquet here. Unfortunately, in the past, there had been accusations made against the Nationalists, because they insisted upon the doctrine of South Africa first, but many of those who accused them were now with them on this point, he said. It always would be the aim of the Nationalists and his government to co-operate with Britain and to do so heartily with the rest of the Dominions.

Soldier Returns Gratuity

Came Back to Old Job and Did Not Need Money

Bridgeburg, Ont.—A former soldier in the Canadian Mounted Rifles, Alfred H. Lewis, 27 years old, a butter employed in Buffalo, has surrendered the \$600 gratuity and pension he received five years ago to Rev. Canon D. Russell Smith, rector of St. Paul's Church, Fort Erie, to be used for the relief of any of his comrades and other persons in distress.

"The money was given me to help me back to civilian life, but it was easy for me, for I came right back to my old job. I have had no need for it and my conscience would not allow me to keep it any longer. I want it used for the purpose it was intended," Lewis said.

Authorized To Borrow \$300,000,000

Ottawa.—In the House of Commons a bill authorizing the Dominion Government to borrow three hundred million dollars to meet maturing obligations, was given first reading. Four resolutions confirming international agreements regarding employment at sea, were passed, and bills based on them given first reading.

NO EMERGENCY LEGISLATION FOR RURAL CREDITS

Ottawa.—A report against emergency legislation this year in regard to rural credits was presented to the Commons banking committee by Dr. Matthew McKay, Liberal, North River, chairman of the sub-committee on rural credits.

The report stated that any plans adopted should apply to all provinces and it would not be possible to create machinery this year, and that, therefore, attention should be concentrated on the drafting of a permanent rural credit scheme.

Dr. McKay also presented a report recommending amendments to the Bankruptcy Act to provide that in bankruptcies having a provincial officer analogous to a bankruptcy trustee, such officer may act as trustee under the Bankruptcy Act where the insolvent is a farmer.

The committee took up the proposal of H. E. Spencer (Progressive, Battle River) that the Bank Act be amended to provide that the entire bank circulation redemption fund be used for the redemption of the notes of defunct banks; and that other banks should be able to recover their contributions to the circulation fund from the defunct bank's assets only after all other liabilities had been paid.

H. T. Ross, secretary of the Canadian Bankers' Association, said the existing fund had proved a sufficient insurance. There had been no losses. There was a long discussion and W. D. Euler, Liberal, Waterloo, asked Mr. Ross if under the Bank Act the Bankers' Association had any right to inquire into the condition of an individual bank.

Mr. Ross replied in the negative. Hon. T. A. Crerar opposed the amendment but thought all notes should be issued by the government. On a recorded vote, the Spencer amendment was defeated, 33 to 20. Hon. J. A. Robb voted against the amendment.

L. J. Ladner, Conservative, St. Catharines, dropped his proposal to abolish the double liability of shareholders.

National War Memorial Unveiled

St. John's, Newfoundland.—July 1st, Newfoundland's annual day of commemoration of the supreme sacrifice made by her sons, on land and sea, during the Great War, was signified by the unveiling of the national war memorial at St. John's by Earl Haig. The ceremony took place before a gathering estimated to number 20,000 and was staged under ideal weather conditions.

BY MOTOR AND PACK HORSE THROUGH CLOUD WONDERLAND

FOR the man or woman in search of healthful recreation, rest for jaded nerves, and a thoroughly enjoyable holiday, the world offers nothing more entrancing than a holiday in Jasper National Park, Canada's wonderland of scenery, where mountain, crag and torrent vie with one another in claiming the attention and where scenic nature is at her best. Towering peaks rise to the north, south, east and west; mirrored in the beauty of placid lakes whose shores provide shelter for the myriad wild life for which the largest of all Canada's national parks is famous.

Whether the tourist goes sight-seeing by motor car or by the more romantic pack pony, Jasper National Park offers him the best that can be found anywhere. Motor roads and pack trails radiate in every direction from Jasper

Park Lodge, the magnificent log cabin hotel of the Canadian National Railways, and the tourist may engage either ponies and guides or an automobile and thus see the mountains at his pleasure. Mount Edith Cavell, named to honor the memory of Britain's heroic nurse, rises by the side of Mount Sorrow, within a short drive of the Lodge and is one of the favorite drives of visitors to the Lodge. The "Devil" highway, smooth-surfaced, winds up toward the very foot of the Ghost Glacier, presenting to the visitor a new vista of scenic wonders at every turn. As one rides toward the foot of the glacier, the Athabasca Valley far beneath presents an attractive picture of calm loveliness, while here and there a lake, reflecting blue sky and sunshine, adds its touch to the beauty of the landscape. There are other drives which may be taken in comfort-

one may go in an hour, for instance, to the wonderful Maligne Canyon, one of the natural wonders of the entire Rocky Mountain region, where rushing waters go tumbling and boiling through a narrow aperture worn in the rock two hundred feet below the feet of the tourist as he or she stands on one of the footbridges which span its narrow width. At any turn of the road the visitor may find himself face to face with a bear or a deer, walking calmly across the highway, while on the sides of the mountains he may see mountain sheep or goats grazing.

The tourist to whom riding appeals will find plenty to hold his attention. Pack trails may be followed for miles, when in the company of an efficient guide, one may set forth to explore regions which are beyond the reach of the motor tourist. The wondrous Maligne Lake and Medicine Lake, with their

quota of mountains reaching down almost to the water's edge, draw more and more tourists every year.

For years the wonders of Canada's national parks have been better known outside of Canada than they have been to Canadians, but year by year Canadians themselves are realizing that they have, in their own country, scenic attractions which are not surpassed anywhere in the world, and consequently the number of Canadians registering at Jasper Park Lodge is showing remarkable increases. Comfortable, steam-heated cabins are provided for their accommodation, an excellent cuisine is maintained at the main Lodge, where surroundings and service are of the world famous Canadian National Railways standard and every care is taken to see that visitors to Canada's largest and finest national park enjoy their outing to the full.

RHEUMATISM GONE, SAYS MONTREAL HOTEL MAN

F. A. Mongeau Tells How He Recovered Strength After Eight Years Of Rheumatism.

F. A. Mongeau, popular night clerk at the Prince of Wales Hotel, 17 and 19 McGill College Avenue, Montreal, Canada, lends his name to further the cause of Tanlac, the treatment that has proved of such great benefit to him.

"After all Tanlac has done for me," said Mr. Mongeau, "I just feel like praising it to everybody. Eight years of muscular rheumatism had just about made a cripple of me. I got to where I simply had to limp around on a cane. My nerves became affected, my sleep sound and I felt completely knocked out."

"Six bottles of Tanlac, taken eight months ago, made a new man of me and I have had no further trouble with rheumatism, or my health, since. My nerves are steady as a die, I sleep fine and feel the same way. Anyone wanting to know of me what Tanlac will do, just phone me here at the hotel."

Tanlac is for sale by all good druggists. Accept no substitute. Over 10 million bottles sold.

Tanlac Vegetable Pills For Constipation. Made and Recommended by the Manufacturers of Tanlac.

Foretells Roadhouses

For Air Travellers

British Air Minister Takes Peep Into the Future

After having taken a peep into the future, Air Minister Lord Thomson came down to the House of Lords recently and assumed the role of prophet. He said in three years' time he hoped to have in the air two kinds of aircraft suitable respectively to commercial and naval purposes. In ten years he hoped to see at least six aircraft constructors competing for orders in this country and building up a great and growing industry, serving the purposes of Imperial communication, bringing people of the empire and the world closer together, and carrying freight as well as mails.

Sometimes in the future, the minister said, he foresaw the day when noble lords would leave Parliament House on gliders with light engines, and wing their way westward along the Thames valley or northwards to Scotland. On land they may call in at some great caravanserai floating serene, safe, high up, far removed from terrestrial fuss and noise.

Mathematicians To Meet

Seventh International Congress To Be Held In Toronto In August

Mathematicians from all parts of the globe will attend the Seventh International Mathematical Congress, which is taking place in Toronto in August, concurrently with the meetings of the British association for the advancement of science. All previous sessions of this body, which constitutes an international parliament on mathematical matters, have been held in Europe. Over 150 delegates from Europe will attend, as well as representatives from the United States and Canada.

Shipping Not Yet Efficient

Will Take German Mercantile Fleet Years to Recover

It will be a good many years before the German mercantile fleet attains its pre-war standard, in the opinion of Carl Stimming, director-general of the North German Lloyd.

"For some years," Mr. Stimming said on his way home from a shipping conference in London, "we must be content with the progress we have made up to the present time."

Kaiser Kepp, managing director of the Hamburg American Line, returning from the same conference, declared there was not the slightest chance of his line resuming its fast pre-war standard of sailings, to and from New York for many years. There are no steamers available, he said, and construction costs have risen so high that the building of ships with speed must wait awhile.

TEETHING TROUBLES

Baby's teething time is a time of worry and anxiety to most mothers. The little ones become cross; peevish; their little stomach becomes deranged and constipation and colic sets in. To make the teething period easy on baby the stomach and bowels must be kept sweet and regular. This can be done by the use of Jibby's Own Tablets—the ideal laxative for little ones. The Tablets are well suited for all the minor ailments of childhood such as constipation, colic, indigestion, colds and simple fevers. They always do good—never harm. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The J. B. Williams Medicine Co., Brooklyn, Ohi.

Britain Increases Old Age Pensions

Chancellor of Exchequer Hopes Soon To Reduce Age Limit

A quarter of a million persons in Great Britain of 70 years or over will benefit as a result of the extension of the old age pensions scheme, which has received the approval of the House of Commons. Philip Snowden, chancellor of the exchequer, when introducing the necessary financial resolution, said single persons having an income, not necessarily earned, of 5 shillings weekly will be entitled to 10 shillings pension weekly and married couples whose income is 50 shillings weekly will be entitled to one pound sterling, jointly, a week. The cost of the additional scheme will be £4,000,000 in the first year, but will rise to £7,000,000.

The proposals, said the minister, in no wise could be regarded as a final settlement of the problem of old age pensions. He hoped shortly to submit a scheme of mothers' and widows' pensions and reduce the age limit to 65.

Heavy Shipments Of Poles

Thousands of big poles have left Slesonau, B.C., for Middle Western States during the past few months. There has been a good demand for that section for telegraph and telephone lines.

Charles E. Moysse, 72, for many years vice-principal and dean of the faculty of Arts at McGill University, is dead.

Dr. Heinrich Held, newspaper owner and leader of the Bavarian People's party, has been selected as the Bavarian premier to succeed Dr. von Kallig.

Premier Herriot asked and was given a vote of confidence of 456 to 26 on a \$50,000,000 franc appropriation to cover expenses of the occupation of the Ruhr.

Dentists from all parts of the Dominion and Pacific states will gather in Vancouver from August 4 to 9 for the annual convention of the Canadian Dental Association.

The government is carrying on negotiations with shipping interests in Britain, with a view to securing a reduction in the ocean rates on Canadian cattle.

An issue of province of Alberta bonds amounting to \$750,000 bearing interest at 5 per cent. and repayable in fifteen years has been awarded to a Toronto syndicate at a price of \$97.46.

Is Your Nose Stuffed With Cold?

Don't load your stomach with cough medicine. Send healing medication through the nostrils and it into the passages that are inflamed with Catarrh.

It's easy to get rid of a bad cold, to drive out Catarrh, to breathe free again, by inhaling Catarrhogene. Send for your drugstore today. By using it frequently you keep the air passages free from germs, and thereby prevent many a bad cold. Two months' treatment \$1.00; small size 50c. Refuse a substitute. By mail from The Catarrhogene Co., Montreal.

Dairying In Saskatchewan

Figures Indicate Big Increase Of Dairy Products Over Last Year

Reports of the creamery output of the province of Saskatchewan for the month of April received at the dairy branch, Regina, show a total of 697,367 pounds of butter manufactured. This is an increase of approximately 25 per cent. over the same month last year, when the output for the province was 558,230 pounds. During the first four months of 1924 the creameries of the province manufactured 2,360,820 pounds of butter, as compared with 1,832,526 pounds in the same period a year ago.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numberless cases and have given relief to many children—who, but for the good offices of this compound, would have continued weak and enfeebled.

World's Deepest Well

The world's deepest well is near Gobellia, France. Boring was started in 1892, and by 1914 a depth of over 10,000 feet had been reached.

For Both House and Stable.—There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

SUNDAY SCHOOL LESSON

JULY 13

THE BOYHOOD OF JESUS

Golden Text: Jesus advanced in wisdom and stature, and in favor with God and men. Luke 2:52.
Lesson: Luke 2:40-52.
Devotional Reading: Psalm 119:1-16.
Reference: Matthew 2:1-23; Luke 2:23.

The Text Explained and Illumined

I. The Development of Jesus, versus 1. Like every one who had ever lived, Jesus entered into the world as a helpless infant, and like all normal children his powers developed gradually. As a child he grew and waxed strong, filled with wisdom, and the grace of God was upon him. You know the CHILD Jesus in a picture at once by a halo around his brow. There was a glow in his real life to mark him; to know his life for his father's brethren thought his fame strange, and his foreman rejected him. Gradually and gently he woke to consciousness of life and its manifold meaning; gradually, and not at once, he embraced the sphere of human duties, and he woke to his earthly relationships one by one—the Son, the Brother, the Citizen, the Master. It is a very deep and beautiful and precious truth that the Eternal Son had a human and progressive childhood. Happy the child who is suffered to be and content to be what God meant him to be—a child while childhood lasts" (G. W. Robertson).

II. Attending the Passover, versus 41. Women were not obliged to attend the Feast of the Passover at Jerusalem. Mary accompanied Joseph on his annual pilgrimage. When Jesus was twelve years old his parents took him with them for the first time, because he was approaching his thirteenth year, when, according to Jewish custom, he would become "son of the Law" and subject to its obligations. Three times Joseph is referred to as one of Jesus' parents, for in the home he provided and protected, he filled a parent's place and played a parent's part. To him also God committed a trust and task.

London Has Sunlight League

Teaches How Light and Air Will Cure Disease

Of all the new societies that have been started in recent years the Sunlight League seems to us the most likely to do good and lasting work for the benefit of mankind. Its aim is, not merely "to teach the benefits of sunlight cures for diseases and debility, but to make everyone understand how these evils may be warded off by abundance of light and air in our homes and work-places. Without such aid to health and enjoyment, we cannot make the most of our lives and dwellings"—these are what the Sunlight League demands. All power to it.—London Daily Herald.

Many mothers have reason to bless Mother Graves' Worm Extirminator, because it has relieved the little ones of suffering and made them healthy.

Mrs. Bromley: "And 'ow do yer husband and pore little get along together?" Mrs. O'Brien: "Well, I pore!" Mrs. O'Brien: "Oh, yer, very well. Mrs. Bromley: 'Ere we've been married gold on six months, an' I ain't 'ad to call in the police but twice."

Minard's Liniment for Rheumatism

Wants Base At Singapore

Useful For Safeguarding Empire Says Canadian Navy League

That the Navy League of Canada should, through its executive, ask the Dominion Government to bring to the attention of the Imperial Government the need of Singapore as a naval base that will safeguard the security of the Empire, was the substance of a resolution introduced and adopted unanimously by the Dominion Council of the Navy League.

Preliminary to the resolution President Samuel Harris read a statement he had prepared on the subject, examining the question from the standpoint of strategy, international relations and the financial aspect.

The president based his observations on the remarks in the British press that Canada had not yet tendered any advice on the subject of the proposed naval base at Singapore to protect the Pacific.

A Divorce Granted

After many years of patient suffering, you can be divorced from corns, you can get rid of them completely by applying Putnam's Corn Extirpator. This wonderful old remedy acts in 24 hours and never fails. Refuse a substitute and remember "Putnam's is the only Painless remedy. 25c every where."

It's all right for a man to talk himself up provided he doesn't run others down.

In Great Britain the women exceed the men by nearly 2,000,000.

Stony Plain and District.

IT PAYS TO ADVERTISE!

Bain, when needed, is a glorious thing! Sunday's contribution was a splendid exemplification of this truth.

Ten cars more of grain left Stony this week.

Mr F Horn is building a new residence on his farm north of town.

Mrs Louie Gabel has been taken to an Edmonton hospital, suffering from the effects of the injuries she received at the Fair Grounds on Sports Day.

Mr Johnny Miller, agent for the Ford, reports the following sales: Touring cars to Wm Zahn of Stony Plain, Hy Myer of Duffield, and A Denly of Gainford; a Fordor Sedan to J McCulla, Stony Plain; a Tudor Sedan to Mr Fred Ducholka.

Residents of Glory Hills who use the Meridian road are pleased at the good work done near the Baseline by Councillor Brox. Two new culverts have been installed and other improvements made.

Mr Percy Lawton, the popular school teacher at Bright Bank, is recovering from an attack of pneumonia.

The Agricultural Society's campaigners are meeting with good success throughout the district, this week, in their canvass for members and prospective exhibitors. When the twelve meet Saturday evening next, their report no doubt will show there is a much keener interest being taken this year in the Annual Fair at Stony.

The officers of the Agricultural Society succeeded in obtaining a \$300 grant from Inga Councillors on Friday last.

Spruce Grove, M. D. Councillors held their regular meeting Monday last.

A very enjoyable picnic was held at Edmonton Beach on Friday last, July 4th, by former residents of the United States.

A very good piece of road work has just been completed in front of Mr J Schoeppe's farm, giving access to St Matthew's Church from the north.

Stony Plain School Board (Weidenheimer's) is said to be advertising for a teacher, as Mr B E McInerney, who is now in Boston, may not return to this school, where he has been employed for the past six years.

Eight cars of grain have been shipped from Mewasala district during the past three weeks.

Dr S Hamilton, dentist, will be in Stony, Friday, the 11th July.

A convention of the Girls Clubs of the Women's Institutes of the province was held last week at Jasper Park. This is the first Park convention held by the clubs.

Help us make a bigger and better Sun each week by phoning or sending in your local news item. We print Wednesday afternoon.

Sporting Notes.

At the picnic at Calahoo on Dominion Day, Glory Hills ball team played a tie game with Calahoo team—21 runs all.

Glory Hills ball team played a game yesterday with the bunch from Muir Lake on their own grounds, and won.

A ball game is being arranged for tomorrow night on the local grounds between the regular team and a picked nine under Eric Heichen.

The rain storm on Sunday last necessitated a cancelling of the trip to Evanston of the baseball and football clubs—a new date will be set for the ball game, as this was a League date.

Stony's ball team plays in Duffield next Sunday, and the Duffers come to Stony the following Wednesday.

It is being arranged to have Stony's footballers play the Duffield kickers on the local grounds on the 18th.

Wheat Pool Dates

The Alberta Wheat Pool for the 1923 crop terminates July 16, and all wheat received after that date will go into the 1924 Pool, Secretary R O Gorman announces.

All wheat delivered to the Pool before Tuesday next, July 15, will go into the 1923 Pool.

Those who deliver after that date will receive the present initial payment but their grain will go into the 1924 Pool.

If a change in payment should be made in the initial payment for the 1924 Pool, an adjustment will be made in those cases where wheat was delivered previous to July 15.

Calendar.

July 11—Dance, Holborn Hall.
11—Ball game, local grounds.
16—Duffield ball team at Stony.
Aug. 12-13—Stony Plain Fair.

Ladies, Please Bring Baskets

Here and There

British Columbia's agricultural production last year increased in value \$4,000,000 over the 1922 period, figures compiled by the provincial Department of Agriculture, show.

A steady increase in the volume of wheat exports from Canada is noted in the monthly statement just issued by the Dominion Bureau of Statistics. In April, 1924, 6,085,406 bushels in all were exported, as against 5,143,204 in April, 1923.

It is anticipated that hundreds and thousands of visitors to the beautiful Annapolis Valley, Nova Scotia, will help to celebrate the famous fruit-district's "Apple Blossom Sunday," which falls on June 8th this year. The entire orchard belt, extending from Annapolis Royal to Windsor, a distance of about 80 miles, is always white and pink with blossom in the first part of June.

Hon. Honore Mercier, Minister of Lands and Forests, speaking of the arrangements made in the province for forest protection this year, stated: "I trust the boys and girls of the service is organized and with the good-will manifested by all classes of the community, who realize the importance of protecting your national domain, the year will be a good one and the losses reduced to a minimum."

The report of the statistician to the board of grain commissioners for April, recently issued, records the heaviest spring grain lakes shipping season on record. The report says that there are indications that all the surplus of the western crops will be moved as fast as transportation facilities permit, as export purchases are to be heavier than usual and all ocean tonnage out of Montreal for May and June has already been engaged, as well as part for the July loading.

Something new in the way of railway equipment is the new storage battery car now operating over Canadian Pacific lines between Galt and Hamilton. The car attains a speed of 35 miles per hour and makes two trips a day in each direction. It has three compartments, general, baggage and mail. The baggage, is of all-steel construction and will accommodate 50 passengers. The service is reported to be giving every satisfaction to the people of the district.

Interviewed in Vancouver, as to the success of the round-the-world cruise completed on May 24th by the "Empress of Canada," E. W. Benson said:

To gauge the success of the "Empress of Canada" round-the-world cruise one has only to ask the passengers their opinion of the entire trip. I spoke to several while crossing from Victoria and with a few exceptions they all expressed their complete satisfaction with the ship, its officers and the arrangements made and carried out since the day the ship left Vancouver almost five months ago.

"That is good enough for me. It is a simple demonstration that the Canadian Pacific can successfully conduct cruises in competition with any organization in the world and maintain the company's standing as a credit to Canada. The 'Empress of Canada' has carried the Canadian flag over the seven seas and into most of the world's ports, and the missionary work she has done for Canada in the various countries visited should not be lost sight of. As one result of the cruise, we look forward with renewed interest to the Canadian Pacific cruise of next season. They include the West Indies, the Mediterranean and another round-the-world cruise which will be made by the 'Empress of France,' already overhauled and fitted with a view to providing the greatest possible comfort for her passengers. The experience gained this year will greatly help in enabling us to make these cruises even more successful than those recently completed."
